

# Exchange Program on smart urban development

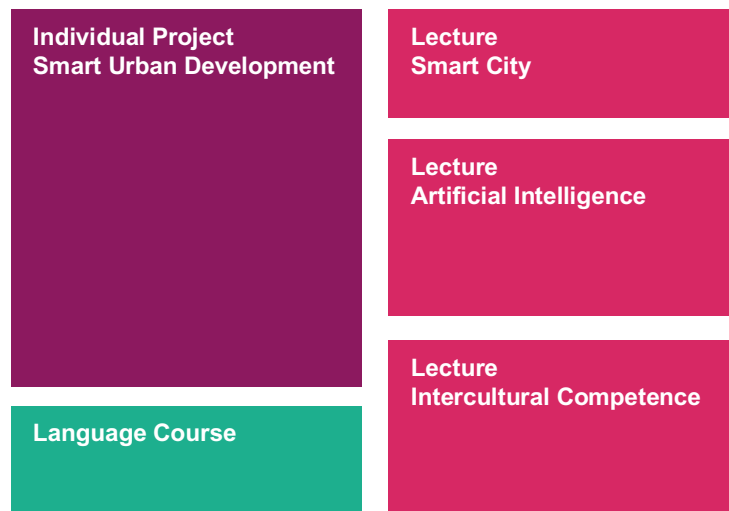

**Bachelor program on Urban Design, Traffic Planning and Spatial Development**

**School of Architecture, Civil Engineering, Landscape Architecture and Spatial Planning**

The exchange program offers incoming students a unique study program in urban design, traffic planning and spatial development in English language. The program comprises up to 20 ECTS.

Besides different lectures regarding smart urban development, an individual semester project is the core of the exchange program and provides an insight to Swiss planning.
